

I'll be covering the Mesopotamian god [Marduk](#) in this volume; He was the patron god of the city of Babylon.

Marduk is Martian (15° in Scorpio- unknown), and if one is to read his history and background, and so on it would become visible right away since He was worshipped for warbased matters primarily. What Marduk has to offer, aside from offense & defense, to the general person is progress within his or her own life, covering nearly all aspects; the goal must be clear though. He appears as a warrior with shield & spear.

Marduk is also mentioned in [The Necronomicon](#) spellbook.
