

I'm recording this for my own personal purposes, this is in reference to the article in which I [dealt with Mercury](#) extensively; I have my first Mercurial celestial spirit, an angel by the header's name called Spipher (pron. *Spaifer*).

He deals wil all things, and specializes in results that will manifest as quickly as possible. Obviously, He is Mercurial and corresponds to 22° in Gemini. Appearance is that of a transparent angel, and non-transparent wise an angel with blond hair & orange robe.

Update per 8/23/2018

I have since then grown in experience with Spipher, and He has done great; He works swiftly, and has served multiple clients who have in most cases reported success. His appearance also varies, from orange to skyblue and I have added Venusian pentacles to the mix that make Him stronger and more potent in dealing with love/ sex related matters. Only drawback is that effects aren't long lasting, normal drawback of Mercurials.
