

I'll be covering the "martian" spirit from the [Arbatel](#) grimoire today, [Phaleg](#); He is said to govern warlike affairs and can raise one up to great heights herein. Wrong.

Phaleg is Lunar (2° in cancer- clingy) & specializes in wealth; this is what He has to offer to the avg person and the only drawback in working with Him is that your occult work with Him might be exposed to the world or others involved in the process. Appearance is that of a specter hovering in the air in general, engulfed in blue flames.
