

I'll be covering one of the demons mentioned in the [Grimorium Verum](#) today, called Scirlin; He is said to be the one in this book to contact before being able to deal with the others, more or less- this is the case, as with most grimoires, only within the grimoire and not in general.

Scirlin is Jupiterian (25° in Sagittarius-forerunner) and excels at wealth, material prosperity and long distance communication. He appears as a short gnome-like creature, green & all, with an orc's head. There are, generally speaking, no drawbacks to working with Him...as is the not case with demons in general. Seal is the header image, given to me by Him. One could also do a self-made seal, but this one is (obviously) better.
