

This article is for people that want information on [Palmistry](#); in short, it is a form of divination where one's hand or better said the lines in it convey information, e.g. one's life and state of affairs as well as specific aspects thereof e.g. marriage.

Before I continue, I do need to state that based on my own knowledge & experience this form of divination does have merit; I ,however, have no real interest in it due to its simplicity compared to Astrology (which I consider to be vastly superior).

[This article](#) should suffice.
